VINT Ltd was founded on March 15, 1990, having the registered office in Donji Ribnik (Municipality of Trstenik), with the aim to offer hydraulic and pneumatic systems, devices and spares to the markets of Serbia and the region.

The Company's initial business activity was forming/tailoring of hydraulic hose lines and trade of spare parts for hydraulic and pneumatic devices and systems. As the time progressed, wishing to meet the demands of the markets, the Company extended the product range and focused on manufacture of hydraulic fittings, servicing and repairing of hydraulic installations and components, as well as manufacture of other industrial hydraulic devices.

The company has been certified by the Military Quality Control of the Ministry for Defence of the Republic of Serbia, and has the licence for manufacture of armament and military equipment in the field of hydraulic pipelines and fittings. The company also has the licence to export and import armament and military equipment and the goods for civil and military applications, broker's services and technical assistance.

We would like to point out years of experience in manufacture of tube and hose fittings produced from zinc-plated steel, chrome-plated steel and brass and designing hydraulic hose lines and pipelines. We can meet the customer's demands and manufacture special types and shapes of fittings for any type of hose lines, as well as any part to be manufactured by CNC lathes.

Our state-of-the-art machinery and modern technologies for forming/tailoring of hose lines, fittings manufacture facilities and test benches, separate warehouses for products for civil and military applications, are the guarantee of our quality.

PRODUCT RANGE>HOSE ASSEMBLIES, FITTINGS, CYLINDERS, HYDRAULIC POWER PACKS

PRODUCT RANGE:

- Swage pipe fittings as per DIN 2353 manufactured from zinc-plated steel, chrome-plated steel or brass,
- Pipe fittings for general applications: welding, lubrication, JIC 37°, ORFS...
- Zinc-plated or chrome-plated steel fittings and bushings for hydraulic pipes. Our products have a wide range of applications in a variety of fields:
- Road and railway vehicles
- Building and construction machinery
- Mining and forestry machinery
- Wood-processing industry
- Machine-building industry
- Food-processing industry
- Oil and chemical industries
- Ship-building
- Military industry, etc.

We also design and manufacture hydraulic cylinders, hydraulic power packs, hydraulic presses and elevators to customer's demands, whose quality is guaranteed, and which incorporate components manufactured by renewed domestic and international manufactures.

In addition to manufacture, as the primary business activity, VINT Ltd has been servicing and repairing hydraulic components, systems and installations for year.

HYDRAULIC HOSE ASSEMBLIES

Hose assemblies for tank M-84 (M-84a) and T-72:

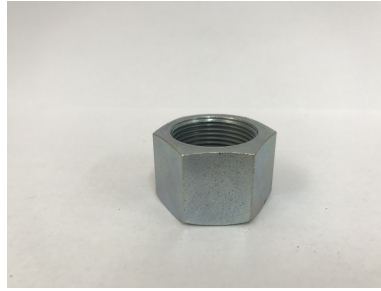

Beside these hoses, we are capable of manufacturing almost any kind of hose assemblies with any special fittings on customer demands as for military use, also for civil use for almost any pressure and size.

On pictures down are some hoses for civil use manufactured by VINT ltd :

HYDRAULIC PIPE AND HOSE FITTINGS

Zinc plated pipe fittings, also can be in inox or brass

Hydraulic hose fittings made by VINT Ltd

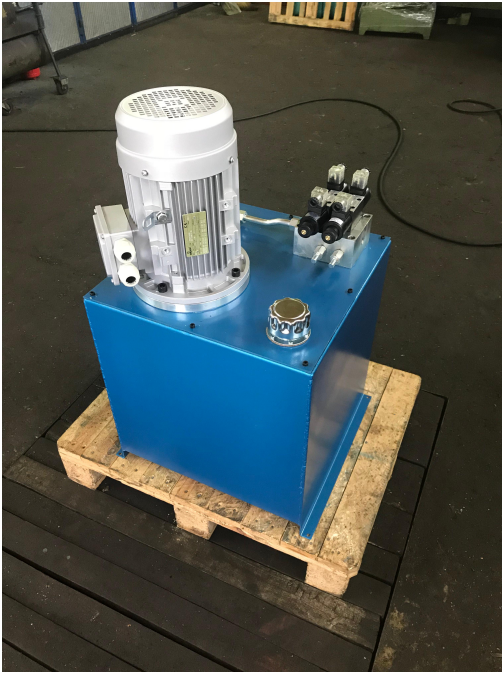

HYDRAULIC CYLINDERS

Hydraulic single acting and double acting cylinders, any sort of dimensions.

HYDRAULIC POWER PACKS

Hydraulic power packs are mostly designed on customer demands and their main purpose are to supply any hydraulic system with hydraulic oil and maintain energy flow through the system.

ARMAMENT AND MILITARY EQUIPMENT

Large specter of armament and military equipment from small and large caliber ammunition to mortars, RPG's, hand grenade launchers, machine guns, pistols, armored combat vehicles to ballistic equipment
